Technical Note:

- The **Types** tab (Tools -> Customize Languages) is database-specific. It **must** be manually aligned with the

- specific terminology used in the active Set of Books to ensure UI consistency.
- As standard charts of accounts may not suit every business or entity, these templates should be reviewed and adapted to your specific needs. These templates support longer field lengths to ensure clarity and alignment with various international and local accounting standards. They must comply with the local accounting standards and legislation (such as tax, company acts, payroll, or labour laws).

AFRIKAANS - Suid-Afrikaanse - Stelle Boeke

Template ID / Set of Books	Titlebar / UI Description	Language File (.dfm)	Accounting Standard / Framework	Target Market \& Structural Focus
4-SUID-AFRIKA-GENERIES-IFRS-KMO	4-SUID-AFRIKA-GENERIES-IFRS-KMO	Afrikaans-IFRS.dfm	IFRS vir KMO's (<i>IFRS for SMEs</i>)	Generiese Afrikaanse besigheidsmodel. Bevat BTW-kodes wat met die SARS VAT201-opgawe belyn is.

Important Notice: Tax rates are subject to change. For a complete and accurate list, it is crucial to consult the official tax authority in South Africa. We strongly recommend that you verify these rates with your local tax authority or a qualified accounting professional before implementing them in your Chart of Accounts or financial records. This will ensure full compliance with the most recent tax regulations.

Chart of Accounts - Accounting Standards Applicability: The 4-SUID-AFRIKA-GENERIES-IFRS-KMO Firebird Set of Books is a template designed for financial reporting in South Africa in Afrikaans.

This generic Chart of Accounts is aligned with International Financial Reporting Standards (IFRS) and is suitable for all micro and small to medium-sized businesses, and could also be used for larger businesses due to its ability to scale for future growth.

A key feature is that it includes a sole proprietorship structure under the Equity section. However, as this is a generic template, users may need to add or remove accounts and review and change the reporting groups (Account Group 1 and Account Group 2) to align with their specific business ownership (sole proprietorship, partnership, or company) and reporting requirements.

South African Legacy Chart of Accounts Templates

All templates designated as **LEGACY** share architectural properties dating back to TurboCASH3. They have not yet been migrated to the modernized schema and are restricted by the following legacy parameters:

•

•

- **Restricted Field Dimensions:** Account descriptions are capped at 35 characters, Group descriptions at 30 characters, and Batch Types (BATTYPES) at 16 characters.
- **Data Truncation Risk:** Company names, message strings, and accounting description tables are prone to compression errors or Dynamic SQL Error -303 because fields have not been expanded to the modern 128-character limit.
- **Placeholder Title Bars:** Title bars display the default generic string “LEGACY - Enter the name of your...”

Architectural Status Note:

These vertical industry profiles are categorized as Legacy Templates. Unlike the country-specific releases, these files have not been migrated to the strict 3X3-DIGITS or specialized 4-digit layout variants. They contain generic chart-of-accounts profiles tailored for specific operational sectors, but lack localized statutory tax groupings or automated reporting compliance tags out-of-the-box.

Repository Folder / ID	Default Company Info - Titlebar	Assigned Language File	Non-Compliant Accounting Standard	Key Observations / Action Notes
CHURCH	INSERT YOUR COMPANY'S NAME	English	Non-profit / Fund Accounting Variances	Generic ledger framework configured for simple fund allocation. Lacks automated compliance for country-specific NGO/NPO statutory reports.
FARMING	INSERT YOUR COMPANY'S NAME	English	IAS 41 (Agriculture) / Biological Assets	Basic inventory and cost-center mapping. Requires deep manual alignment to handle biological asset revaluations or agricultural grant tracking.
MEDICAL	PINK SOFTWARE	English	Health Sector Regulatory Mandates / Patient Privacy Data	Pre-configured baseline containing legacy specific headers. Lacks native metadata mappings for modern medical insurance billing codes or healthcare-specific audit trails.
RESTAURANT	Rubys Restaurant	English	Hospitality Inventory (Spoilage & Yield Tracking)	Configured baseline for food and beverage stock tracking. Lacks integrated automated recipe costing matrices, waste/spoilage management rules, or live point-of-sale (POS) terminal API mappings out-of-the-box.
RETAIL	INSERT YOUR COMPANY'S NAME	English	Generic Sales Tax / Regional VAT Variances	Standard point-of-sale style layout. Does not contain pre-mapped country-specific tax rules or localized electronic invoicing hooks.
SCHOOL	INSERT YOUR SCHOOL'S NAME	English	Public Sector Financial Reporting Standards	Configured with departmental and tuition tracking codes. Needs manual intervention to satisfy specific regional education board auditing demands.

SERVICE	INSERT YOUR COMPANY'S NAME	English	Basic Accrual Accounting Only	Minimalist layout optimized for service-delivery billing. Serves as a reliable, clean baseline for manual customization but carries no localized tax or statutory logic.
WORKSHOP	INSERT YOUR COMPANY'S NAME	English	Standard Work-in-Progress (WIP) Tracking	Structured to track simple job card costing and labour hours. Does not natively incorporate complex manufacturing overhead distribution or modern supply-chain auditing logic.

AFRIKAANS - VEROUDERDE STELLE BOEKE SJALABONE

Net soos die Engelse eweknieë, word hierdie vertikale bedryfsprofile as Legacy Templates geklassifiseer. Hierdie lêers is nie na die nuwe 3X3-DIGITS of gespesialiseerde 4-syfer-stelsels gemigreer nie. Alhoewel die gebruikerskoppelvlak en rekeningname in Afrikaans vertaal is vir plaaslike gebruik, bevat hulle bloot basiese generiese grootboekstrukture sonder geoutomatiseerde statutêre belastingkartering of landspesifieke wetlike nakomingstags.

Repository Folder / ID	Default Company Info - Titlebar	Assigned Language File	Non-Compliant Accounting Standard	Key Observations / Action Notes
BOERDERY	TIK U BOERDERY SE NAAM HIER IN	Afrikaans	IAS 41 (Landbou) / Biologiese Bate-nakoming	Basiese inventaris- en kostesentrum-struktuur vir landbouaktiwiteite. Vereis handmatige aanpassings om biologiese bates en markwaardeveranderings korrek volgens moderne IFRS-reëls te hanteer.
DIENS	TIK U BESIGHEID SE NAAM HIER IN	Afrikaans	Basiese Toevallingsrekeningkunde (Accrual Only)	'n Eenvoudige, skoon uitleg wat geoptimaliseer is vir diensgebaseerde fakturering en uurlikse tariewe. Dien as 'n goeie baslyn vir vinnige opstellings, maar bevat geen outomatiese belastinglogika nie.
MEDIES	TIK DIE NAAM VAN U PRAKTYK HIER IN	Afrikaans	Gesondheidsektor Regulerende Mandate / Pasiëntprivaatheid-data	Opstelling gerig op algemene mediese praktyke. Bevat geen ingeboude strukture vir moderne mediese-fonds eise-kodes (e.g., ICD-10 kodes) of gesondheidspraktyk-ouditspore nie.
KERK	TIK U KERK SE NAAM HIER IN	Afrikaans	Niewinsgewende Organisasies (NPO) / Fondsrekeningkunde	Generiese uitleg vir basiese gemeente- en fondsbestuur. Voldoen nie outomaties aan die spesifieke statutêre state of SARS (NPO/PBO) wetgewing wat vir oudits vereis word nie.
HANDELAAR	TIK U BESIGHEID SE NAAM HIER IN	Afrikaans	Generiese Verkoopsbelasting / Plaaslike BTW-afwykings	Tipiese kleinhandel- en herverkoopsmodel (Retail/Wholesale). Bevat geen vooraf-gekonfigureerde nasionale belastingtabelle of skakels na geoutomatiseerde e-faktureringstelsels nie.

WERKSWINKEL	TIK U BESIGHEID SE NAAM HIER IN	Afrikaans	Standaard Werk-in-Progres (WIP) Naspeuring	Uitgelê om basiese werkskaarte (Job Cards), herstelkoste en arbeidseise te monitor. Sluit nie ingewikkelde vervaardigingsbokoste of moderne voorsieningsketting-ouditlogika in nie.

Ontplooingswaarskuwing (Deployment Warning):

Alhoewel hierdie lêers uitstekende funksionele baslyne bied vir Afrikaanssprekende gebruikers en vinnige bedryfopssettings, is hulle nie wetlik vooraf-gekonfigureer nie. Lokalisering-spesialiste en stelseladministrateurs moet belastingkoerse (BTW), valuta-instellings en plaaslike finansiële verslagdoeningslyne handmatig in die databasis kontroleer en aanpas voordat hierdie profiele in 'n lewendige produksie-omgewing ontplooi word.
